Know how far to trust an answer before you act on it.

TrustLens AI shows how confident each answer is and the evidence behind every claim, so you can check it yourself before you apply, pay or decide.

Create account
Continue as guest

Guests can start right away. Anything you save carries over when you create an account.

Every answer shows its working.

You see the confidence first, then the claim, then where it came from.

Ask in plain words

Type a question about eligibility, fees or deadlines. Search topics, or ask a follow-up whenever something is unclear.

See how confident it is

A confidence level and meter come with a short list of reasons: how many sources, whether they agree, and how recent they are.

Open the evidence

Select any highlighted claim to see its source, page, section and the date it was last checked.

Some answers are strong. Some are honestly empty.

When evidence is thin, conflicting or missing, TrustLens says so instead of guessing. You always know which kind of answer you are reading.

Eligibility
Who can apply
High confidence 86%
One clear source and no conflicting source found.

Fee
Costs & deadlines
Low confidence 30%
No source states a figure, so none is given.

Conflict
Sources disagree
Medium confidence 55%
Two sources differ. The official notification settles it.

Unknown
Not enough evidence
Low confidence 15%
No evidence supports an answer, so TrustLens does not offer one.

Every answer ends with what to check first.

Match your degree, year and category, compare published dates, and confirm with the official source before paying anything.
